Legacy Offshore ISO 9001;2008 Certification Announcement

League City, TX – Legacy Offshore, LLC. announced today that it has achieved its goal in acquiring ISO 9001;2008 certification. Company executives expect this achievement to systematically strengthen its strong views on safety as well as improve its product and service lines both domestically and internationally.

The ISO 9001;2008 standard represents an international consensus on effective management practices, policies and procedures. This achievement is aimed to support Legacy Offshore’s plans in widening its customer base and continually maintaining the highest “quality” in customer satisfaction.

CEO, Louis E. Schaefer, said, “This is testament to the commitment of our management staff to raise the quality of service and continue to adhere to the highest safety standards.

Legacy Offshore’s President, Charles Zamora went on further to say, “This certification endorses our commitment to safety and procedural uniformity throughout our company. Our clients can be confident that Legacy Offshore is dedicated to maintaining the highest quality service that our clients have come to expect and rely-on”.

About Legacy Offshore

Since 2007, Legacy Offshore LLC has been a proud leader in the subsea construction, project management and fabrication industries.
